## EDUCATION

### Arizona State University, Tempe, Arizona

Bachelor of Science in Computer Science | Moeur Award Recipient

May 2025

GPA: 4.0

## EXPERIENCE

### Amazon

Software Development Engineer Intern

May 2025 - Aug 2025

Seattle, Washington

- Owned end-to-end development of an **LLM-powered system** using **AWS CDK (Typescript), Bedrock, and Java-based Lambda functions** to generate reputational signals, and analyze behavioral patterns of **10K+ sellers/day**.
- Designed and deployed a **scalable monitoring pipeline** with AWS Services to **rank high-risk sellers** by leveraging **infringement history and behavioral indicators**, integrating it into brand-level enforcement workflows.
- Integrated **AWS DynamoDB and S3** to store extracted seller details and generate real-time signals for protection teams, reducing false positives and manual review by **35%** and enabling proactive catalog-wide violation prevention.

### Piper LLC

Software Engineer Intern

Sep 2024 - May 2025

Tempe, Arizona

- Designed and built the iOS frontend in **Swift** based on **Figma** mockups for a **real-time ride-sharing app**, delivering responsive UX across rider and driver flows with synchronized backend integration.
- Engineered **WebSocket-based live communication** for real-time ride updates and integrated OTP verification for secure ride initiation, cutting fraudulent ride starts by **40%** and improving reliability of live rides.
- Implemented **Mapbox** geolocation services with proximity-based constraints to enforce location-aware ride rules, contributing to app architecture, UI polish, and end-to-end system logic for deployment readiness.

### Academic Support Network, ASU

Tutorbot Content Curator

Jan 2024 - May 2025

Tempe, Arizona

- Created **50+** AI chatbot resources covering computer science and math topics, increasing engagement by **30%**.
- Produced **over 20** educational videos and content posts simplifying complex topics in computer science and math.
- Adopted **agile methodologies** and streamlined collaboration, increasing productivity and project outcomes by **20%**.

### Ira A. Fulton School of Engineering, ASU

Undergraduate Teaching Assistant

Aug 2023 - Dec 2023

Tempe, Arizona

- Managed a class of **180+ students**, holding office hours for conceptual doubts, reviews, and academic discussions.
- Conducted targeted review sessions to strengthen exam preparedness, boosting student engagement by over **35%**.
- Advised students individually on coursework and assessments, fostering measurable academic growth and participation.

## SKILLS

- Languages:** Python, Java, C++, JavaScript, TypeScript, Swift, C#, SQL, HTML5, CSS
- Tools:** AWS, Git, Github, Docker, Firebase, PostgreSQL, MongoDB, Figma, Jira
- Frameworks:** PyTorch, Numpy, Pandas, ReactJS, NextJS, NodeJS, Angular, Flask, SwiftUI, Tailwind

## PROJECTS

### Face Recognition using Edge Computing | Python, AWS, FaceNet, boto3, Flask

- Developed a distributed face recognition system with **AWS IoT Greengrass and Lambda**, cutting cloud latency by **60%**.
- Integrated **MTCNN + FaceNet models** with Flask APIs and AWS services, achieving **95%+ accuracy** in recognition.
- Deployed IoT-enabled recognition pipeline on EC2, enabling scalable video stream analysis with high reliability.

### News Bite - Personalized News Summarizer | SwiftUI, Firebase, MapKit, Hugging Face

- Built a personalized news app that **summarizes articles** with Hugging Face models, helping users access only relevant content.
- Integrated **customizable preferences** for topics and regions, curating personalized news feeds tailored to user interests.
- Implemented **Firebase authentication and storage** for secure access, saving articles, and summaries for later reading.

### Wallet Whiz - Personal Finance Tracker | JavaScript, ReactJS, Firebase

- Built a full-stack finance tracker with **Google OAuth and real-time Firebase syncing**, maintaining **98% uptime**.
- Added **interactive data visualizations** (bar charts, line graphs) to track income and spending, boosting insights by **25%**.
- Deployed responsive frontend with Tailwind CSS, delivering a polished user experience across devices.

### Movie Recommendation System | Python, Pandas

- Created a recommendation engine with **TF-IDF and cosine similarity**, processing **25M+ MovieLens entries**.
- Optimized notebook-based recommendation pipeline, reducing processing time by **40%**.
- Designed an interactive interface to deliver real-time, personalized movie suggestions for users.

## EXTRA CURRICULAR

### CodePath Technical Interview Prep

Jun 2024 - Aug 2024

- Participated in meetings, collaborated with peers to solve Leetcode problems in Python, and deepened my understanding of technical interview techniques, focusing on **Data Structures and Algorithms**.
