EDUCATION

Arizona State University, Tempe, AZ

Expected Graduation: May 2025

Bachelor of Science in Computer Science

GPA: 4.0

Relevant Coursework – Data Structures and Algorithms, Object Oriented Programming, Distributed Software Development, Software Engineering, Operating Systems, Machine Learning, Mobile Application Development, and Digital System Design

EXPERIENCE

Software Engineer Intern, The Piper LLC

Sept 2024 – Present

- Brainstorming and implementing **UI/UX** designs using **Figma**, ensuring an intuitive user interface.
- Aim to build core features in **Go**, **Swift**, and **Rust**, integrating **Stripe** and **Mapbox**, enhancing user experience.
- Managing code using **Git** for version control, and utilizing **XCode** for efficient and robust development.

Tutorbot Content Curator, Arizona State University

Jan 2024 – July 2024

- Created **50+** AI bot resources across various subjects like Computer Science, increasing user engagement by **30%**.
- Produced **20+** short concept videos and tips and tricks posts for various subjects.
- Implemented **agile methodologies** to enhance workplace productivity and project outcomes by **20%**.

Teaching Assistant, Arizona State University (Principles of Programming with C++)

Aug 2023 – Dec 2023

- Managed a class of **180+** students and held office hours for doubts, reviews and discussions.
- Conducted review sessions that enhanced exam preparedness, increasing student engagement by **35%**.
- Advised students individually on assessments and activities, fostering academic growth.

PROJECTS

Wallet Whiz - Personal Finance Tracker | *JavaScript, ReactJS, Firebase*

- Designed and launched a full stack responsive web application with **98%** uptime, integrating **Google authentication** for users, leveraging **ReactJS** and **Firebase** to securely manage and store user data.
- Engineered comprehensive data visualization tools, including **categorized charts** and **dynamic line graphs**, analyzing spending patterns and income trends effectively, improving financial decision-making by **30%**.
- Constructed an intuitive user interface using **Tailwind CSS**, enhancing user experience by presenting detailed transaction data in organized tables, resulting in a **25%** increase in user satisfaction for financial tracking.

Movie Recommendation System | *Python, Pandas*

- Created a movie recommendation system employing **TF-IDF vectorization** and **cosine similarity**, processing over **25M** entries from the MovieLens dataset to provide precise and personalized film suggestions.
- Designed a **Jupyter Notebook** interface, facilitating real-time movie recommendations with seamless handling of extensive datasets, achieving a **40%** reduction in processing time and enhancing user interaction and satisfaction.

Stock Finder | *C#, HTML, CSS*

- Developed a web platform with **C#** and **ASP.NET** and deployed on ASU's web server, seamlessly incorporating financial metrics and news APIs through **WCF**, **WSDL**, **SOAP**, and **RESTful** services for real-time data access.
- Implemented comprehensive security features, including **encrypted** passwords and **CAPTCHA**, leading to a **60%** reduction in security incidents, and optimized dynamic **XML** file handling.

Word Frequency Analysis | *C++*

- Engineered a **text parsing algorithm** in C++ using a **binary search tree**, enabling efficient analysis of large text files to generate exact word frequency counts and detailed analytical summaries.
- Analyzed texts from novels of **2000+** pages, delivering comprehensive summaries and insights.

EXTRACURRICULAR EXPERIENCE

CodePath Technical Interview Prep

Jun 2024 – Aug 2024

- Participated in meetings, collaborated with peers to solve **Leetcode** problems, and deepened my understanding of technical interview techniques, focusing on **Data Structures and Algorithms**.

SKILLS

Languages: Python, C++, C, C#, Java, JavaScript, Typescript, Swift, Go, Rust, HTML, CSS

Frameworks: React, Next.js, Vue.js, AngularJS, Tailwind, Flask, Node.js, Pandas, SwiftUI

Tools: Git, GitHub, AWS, MongoDB, Jira, MySQL, PostgreSQL, Firebase, Monday.com, Windows, MacOS, Linux
